

Sr. Airport Planner – Orlando, FL

Company: AVCON, INC.

Position Title: Sr. Airport Planner

Location: Orlando, FL

Status: Exempt

Application Deadline: Open Until Filled

AVCON, INC. is a Florida-based full-service engineering and planning firm established in 1988 specializing in airports, transportation facilities, and site development projects. As a growing firm, we continually look for talented engineers in the civil, structural, electrical, and mechanical disciplines. We have a staff of over 70 professionals headquartered in Orlando, Florida with regional offices in Niceville, Florida and Charlotte, North Carolina.

Our projects range from facility master plans to pavement evaluation and design, power distribution, building lighting and electrical systems design, airfield lighting, navigational aids, hangar developments, security and low-voltage electrical projects, roadway designs and traffic assessments, utility and storm water improvements, residential and commercial site planning, HVAC design and plumbing, fire protection, and structural design.

AVCON is the second largest engineering firm headquartered in Orlando according to the Orlando Business Journal 2015 Book of Lists. The firm has ranked within the top 20 of the Orlando Sentinel's Top 100 Companies for Working Families seven years in a row.

AVCON transforms today's ideas into tomorrow's reality.

POSITION DESCRIPTION

As part of the planning team, the primary responsibilities of the Sr. Airport Planner will be to manage the airport planning activities ranging from small to large projects addressing airport development, air traffic control, and land use needs. The planner will develop the preparation of master plans and other planning projects, including inventory, demand/capacity analysis, airfield and terminal planning, facility requirements, alternatives analysis, capital improvement programs, and Airport Layout Plans.

ESSENTIAL QUALIFICATIONS

- Bachelor's degree in airport planning, airport management, engineering, architecture, transportation, or related field.
- A minimum of 5+ years' experience as an Airport Planner with strong relationships within the airport community.
- Experience in the use of AutoCAD 2014 or newer as a planning tool, required.
- Familiarity with GIS, preferred.
- Experience using Transoft Solutions AviPLAN (PathPlanner and AeroTURN), preferred.
- Familiarity with NEPA requirements, required.
- Proficiency with MS Outlook, MS Excel, MS Word, and MS PowerPoint, required.
- Familiarity with Photoshop, desirable.

REQUIRED KNOWLEDGE, ABILITY, AND SKILLS

- Proficient knowledge of airport planning principles and design standards.
- Proficient knowledge of federal and state laws and regulations relating to airport development.

Sr. Airport Planner – Orlando, FL

- Strong understanding of state/federal funding processes.
- Strong technical knowledge in state and municipal design requirements and regulations.
- Knowledge of the principles of urban planning and zoning.

LICENSURE

- Valid drivers' license and maintenance of satisfactory driving record.
- AICP or Professional Engineer licensure, highly desired.
